OWN MODELED OUTBOARD

SUCCESSOR

STEREO BUS COMPRESSOR

i73 PRO DSP / NATIVE

THE BRITISH DIODE-BRIDGE COMPRESSOR THAT CHANGED THE INDUSTRY FINALLY AVAILABLE IN PLUGIN

When we released the SUCCESSOR it was a first in its class, finally allowing creative engineers, producers and musicians to apply warm, colorful and fat compression.

Originally conceived for the MIX bus the SUCCESSOR has actually become a popular choice for all the different aspects of music & sound production. Finding its way into tracking sessions, on to subgroups and even at the MASTERING stage.

Adopted by top class engineers like Chris Lord-Alge, and present in thousands of studios, the SUCCESSOR has become a must have piece of outboard gear that is shaping the modern music production.

NO ONE LOVES YOU LIKE YOUR PARENTS DO

Over the years we've received dozens of request by plugin manufacturers to recreate its mojo, energy and vitality but we just had to do it by ourselves....

...and now the Heritage Audio SUCCESSOR plugin is available everywhere to anyone who wants to recreate all of the features that its outboard predecessor has…and more.

WARNING! THINGS CAN GET WILD HERE!

The newly added ´NUKE´ feature pushes the boundaries of traditional compression and takes your signals to the next level. An extra +20dBs added right before compression forces a more extreme reaction, and then gives you control to make up any or all of the +20dBs at the output stage….essentially taking the compressor into new territory and benefitting from its exaggerated response.

THE HERITAGE AUDIO WAY

Our goal is to create helpful tools to channel creativity and put the focus back on music production. That is why want to reach as many users as possible with a comprehensive and fair pricing scheme:

That is why all SUCCESSOR hardware owners will get a SUCCESSOR native plugin for free and all i73 PRO owners will get a SUCCESSOR native and DSP plugin for free. As for the rest, a guaranteed no BS price of $99 / 99€ and a 14-Day demo trial.

No BS price: $99 / 99€

Available for Mac and Windows in AAX, AU and VST3

FULL ANALOG EXPERIENCE
