HA 240 GOLD FOIL VERB

NATIVE ONLY

THE VINTAGE UNIT THAT SAT IN HERITAGE AUDIO'S FACTORY FOR YEARS...

Introducing...the HA 240 Gold Foil Verb modeled after the original unit from Heritage Audio's private collection...or maybe its private storage room.

Thought to be a non-functioning unit, the original huge box sat unattended for years, waiting to be torn apart for spare parts.

...WAS ALIVE AND SOUNDING BETTER THAN EVER!

Until one day, one of Heritage Audio's talented engineers opened it up for testing and realized that the unit was working properly and that years of storage had improved its performance in ways that only years can do to classic vintage equipment.

A UNIQUE PLUGIN BASED ON A TRUE SURVIVOR

Based on the original unit (Serial # 0183) that was used heavily by Peter in the early days of his recording career. Once we heard how the original unit sounded, we couldn't help but meticulously capture the gorgeous sound and vibe of this one-of-a-kind studio classic and turn it into a fun and musically inspiring plug-in.

The HA 240 Gold Foil Verb gives vocals, guitars, strings, and synths a distinct, dark, yet enticing space that enhances any source.

A PLUG-IN BASED ON A ONE-OF-A-KIND GOLD FOIL REVERB
