PBR LIT

Customizable rackmount LED display for patchbay labeling

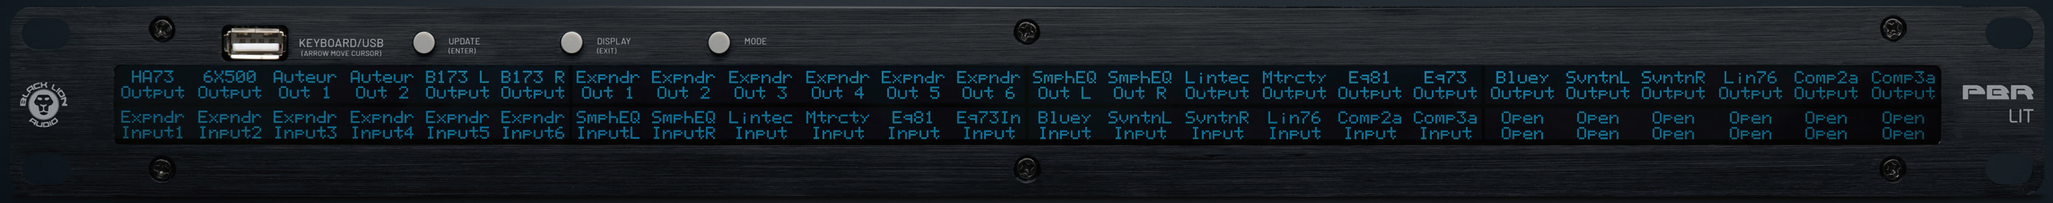

BLACK LION AUDIO

SOUND BETTER
BETTER SOUND

Get Lit.

Label your patchbays in luminous style! Save your markers and labels for your next yard sale.

PBR LIT is a 1U LED patchbay display for creating custom digital labeling of your existing patchbays. Edit your digital labels quickly and easily by attaching a USB keyboard, or via the included Patchcad BLA Edition software. Four modes offer layouts for TRS, TT, and XLR patchbays, as well as a customizable user setting for alternative layouts or creative signage.

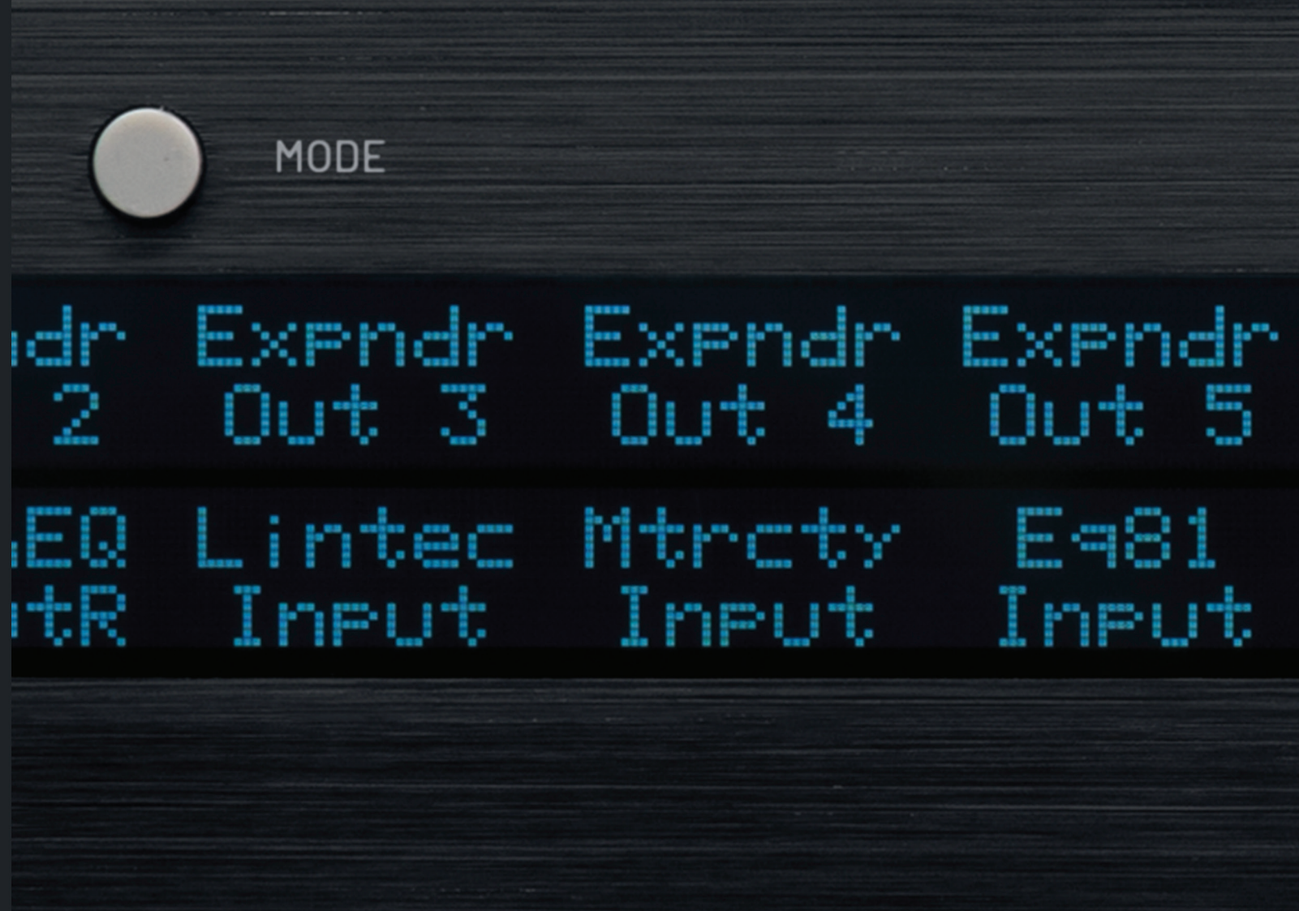

A mode for every patchbay layout and more.

PBR LIT has four layout modes in support of different patchbay layouts.

- Mode 1: 48-point TRS
- Mode 2: 96-point TT
- Mode 3: 16-point XLR
- Mode 4: Custom

Custom mode gives you full use of the screen to create a custom display of whatever text you would like... for patchbays or otherwise. Get creative!

Road-worthy construction and good-lookin'.

Black Lion's team of engineers have worked tirelessly to ensure that the PBR LIT delivers proper quality through-and-through. It's built Black Lion-tough, with a reinforced steel chassis and black-anodized aluminum faceplates. Its sleek black finish and futuristic blue glow make for a matched, modern, sophisticated look that brings more than a dash of modern vibe to your creative space.
