ANALOG MODELED EFFECTS

HA 1200 TAPESAT

i73 PRO DSP / NATIVE iLOK

BASED ON A ONE-OF-A-KIND TAPE RECORDER

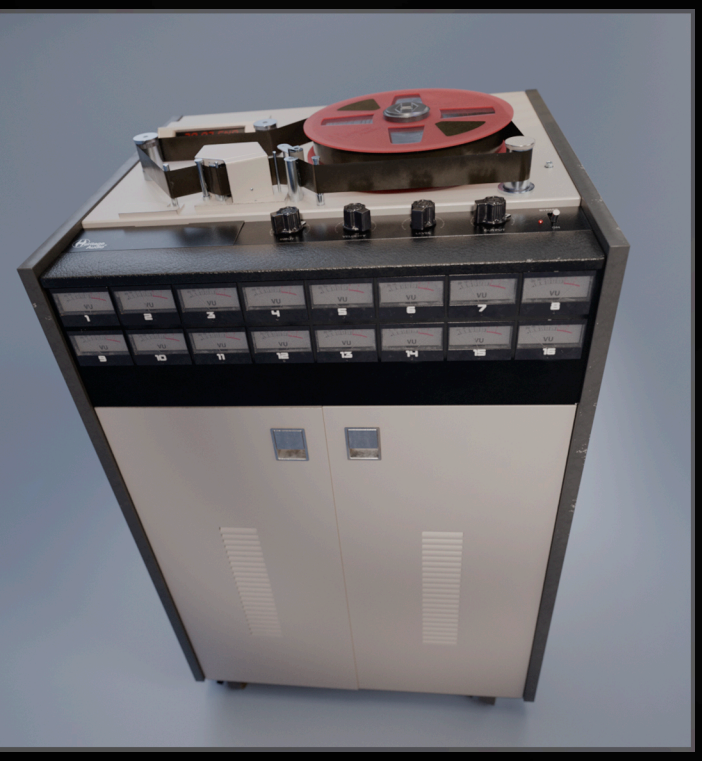

The HA 1200 TapeSat is modeled after the original unit (Serial # 0232) owned by Heritage Audio's CEO, Peter Rodriguez. The machine was bought by Peter when he was 19 years old and has been his main tape recorder ever since.

After discovering just how good a professional reel-to-reel recorder sounded...there was no turning back. His recordings now sounded like many of his favourite albums from the last few decades.

BRINGING BACK THE WARMTH OF THE GOLDEN ERA OF RECORDING

The HA 1200 TapeSat gives you that sought after true analog sound of tape, allowing you to quickly add punch, warmth and depth to your vocals, synths, guitars and more. Getting that special *je ne sais quoi* of the Golden Era of Recording is now easier than ever.

INSTANT CLASSIC MOJO FOR YOUR TRACKS

Analog tape provides a smoothing result on any sound that is recorded onto it. The HA 1200 TapeSat generates the presence, glue effect, and low-end punch that is characteristic of genuine tape.

With only 5 knobs and 5 different tape choices, modeled after vintage NOS tapes, the HA 1200 TapeSat is a simple yet powerful tool with endless saturation possibilities.

The most faithful representation of this classic 2-inch analog multitrack tape recording is finally here.
