HERITAGE TAPEOPLEX

NATIVE iLOK

NAILING THE SOUND OF THE MOST FAMOUS TAPE ECHO UNIT OF ALL TIME

Heritage Audio is proud to announce the availability in native form of the Heritage TAPEoPLEX tape delay plugin. Based on the beloved vintage tape delay used by everyone from Eddie Van Halen to Brian May, Jimmy Page, Neil Young and many others, the Heritage TAPEoPLEX just nails the sound of the most famous tape echo unit of all time.

Ranging from soft and clean delays to distorted repeats that lead to self-oscillation, the warmth and space that the TAPEoPLEX adds to your tracks is unmatched by any tape delay plugin in the market.

USING 2025 TECHNOLOGY TO FULLY RECREATE THE SOUND OF THE MOST SOUGHT AFTER ECHO MACHINE

It was about time someone got serious about recreating the legendary tape delay sound to today's standards. And taking advantage of the extra options that a plug-in allows, the TAPEoPLEX is now a full independent stereo unit where you can choose different echo times for the L and R channel or link them to have the same or different delay time constant on each side, following either the same tempo or the DAW's tempo.

An additional control even allows to choose the amount of freshness of the tape, adding color and a slight harmonic distortion to your tracks when needed.

THE HERITAGE AUDIO WAY

Our goal is to create helpful tools to channel creativity and put the focus back on the "music" in music production. That is why we want to reach as many users as possible with a comprehensive and fair pricing scheme:

All i73® PRO hardware owners will get the TAPEoPLEX native plugin for free.
As for the rest, a very affordable price of $99 / 99€ and a 14-Day demo trial.

Street price: $99 / 99€

Available for Mac and Windows in AAX, AU and VST3
