SILVERR 47®

The sound that defined an era

ALL TUBE STEREO MICROPHONE AMPLIFIER

SILVERR 47®

ALL TUBE STEREO MICROPHONE PREAMPLIFIER

LANG ELECTRONICS Inc. and HERITAGE AUDIO are proud to present the SILVERR 47® all tube stereo microphone preamplifier, our take on the unique preamp that served as the foundation for the fresh and furious British Invasion sound that conquered the world in the 60s.

THE HOLY GRAIL OF VINTAGE TUBE PREAMPS

The SILVERR 47® cleverly recreates the original design to serve as a stand-alone dual-channel mic preamp that nails the sound palette of one of the most revered tube preamps of all time.

A rather simple, yet flavorfull design that has been adapted to perfection for the needs of modern studios more than 60 years after its creation.

THOROUGHLY RECREATING THE SOUND THAT DEFINED AN ERA...

...and set the path for modern professional studio recording as this legendary design has proven to be the secret sauce for many experienced contemporary producers in almost any musical genre you can imagine from pop to rock, alternative music, metal, hip hop, and even electronic music.

And as a unique Heritage Audio's design feature we have added a NO FEEDBACK gain position, which drastically boosts harmonic distortion to previously unavailable levels, turning the SILVERR 47® into a one of a kind shaping tool.

YOU SAY YOU WANT A REVOLUTION?

Well, you know... LANG ELECTRONICS Inc. has just done it again by releasing one of the most sought after preamps of all time in a convenient two channel form and at a price that would have even been hard to believe in the 1960s. so every studio owner or self-recording artist can justify getting at least one.

The sound of yesterday, built for tomorrow.
